Dear Sir, I am happy to see this journal hosted on Wordpress as a blog, where the readers and authors can interact. I subscribed to this journal during the first contact programme at CFH, Oddanchatram. The articles are very interesting and can't wait to have my bite. This is an effort in the right direction to reach out to wider audiences, especially by making some of the important articles Open Access. Best wishes,

Dr. B. Manoj Aravind, Hyderabad, Telangana.

I was going through the Current Medical Issues journal and I should say your team has put in hard work for it and that's why we are able to get quality material. Thanks for that.

I would also like to add that do give a topic on - How to monitor Warfarin dosage in accordance to INR value practically. We face problems regarding it while serially monitoring the INR and dosage adjustments,

Dr. Priyeshkant, Lucknow, U.P.

Greetings from Distance Education department! This is just a note of appreciation on the wonderful work that you are doing with the CME journal.

I have been reading through the past few issues of the journal and I find all the articles and other writings to be of very high quality. The spread of articles is also very relevant for the practicing physician. I also found the human interest stories to be very inspirational and it was wonderful to finish off the readings with a devotional. The CME in images is another wonderful learning tool for anyone needing a some quick bites.

As far as the healthcare worker is concerned, there seems to be 'something for everybody to read and learn from'.

I'm taking the liberty to also add a couple of small suggestions as I was reading through the journal:

- There seemed to be some inconsistencies with line spacing and a few font sizes...just a small technical issue I guess.
- A few of the pages (especially in the Jan 2016 issue seemed too crowded - For eg: pgs 23-26. I understand it's hard to break algorithms down but was wondering if there's any other way in which these could be presented?)

Keep up the great job and looking forward to reading many more issues!

Rebekah Zechariah, MD (Int. Medicine), MD (Geriatrics), MS (Higher Education), Dept. of Distance Education,Christian Medical College, Vellore.

The article on Childhood Asthma (CMI 14:1, Jan 2016) was very useful and exhaustive.

Dr. Jyothi Ganapathy, Bangalore, Karnataka.

Acute Asthma in Children, Organophosphate poisoning, Evidence Updates are very useful. I appreciate the CME lessons a lot.

Dr. Lamina Singh, Cachar, Assam.

Please send in your comments and suggestions by email or in the attached inland letter. We would love to hear from you. Editor.
